Students who choose the College of Engineering are exposed to a variety of services and opportunities that will enhance their studies. Our family of faculty and staff throughout the college offer guidance, assistance, and support at every step of a student’s experience at Iowa State. Remember, there is always someone here who is ready to help.

Career Services

Engineering Career Services prepares students for professional careers by helping them understand the career self-management and job search processes. Students are encouraged to begin this preparation early in their freshman year by cultivating opportunities for career-related internship or cooperative education experiences prior to graduation. To support our students’ efforts, each year Engineering Career Services hosts thousands of on-campus personal interviews, more than 100 company information meetings, and more than 100 seminars and workshops for students to discuss career opportunities with more than 300 companies and 1,000 recruiters.

For more information on the services provided by Engineering Career Services, please contact us at:
308 Marston Hall
Iowa State University
Ames, Iowa 50011
www.engineering.iastate.edu/ecs
ecs@iastate.edu
515 294-2540

Distance Education

Engineering Distance Education (EDE) allows students the opportunity to take courses and programs beyond the boundaries of the traditional classroom, with upper-level offerings in almost every engineering field. They’re the same courses students take on campus, taught by the same professors, and with the same support as offered on campus. Students can also take them on archived online lectures at their convenience. It’s the perfect academic complement to the experiential learning while in a co-op or internship work experience. Complete course details and updated listings can be found on the EDE Web site.

For more information on Engineering Distance Education, please contact us at:
1328 Howe Hall
Iowa State University
Ames, Iowa 50011

Iowa State University does not discriminate on the basis of race, color, age, religion, national origin, sexual orientation, gender identity, sex, marital status, disability, or status as a U.S. veteran.
Inquiries can be directed to the Director of Equal Opportunity and Diversity, 3680 Beardshear Hall, 515 294-7612. ECM 08310
**Diversity Affairs**

The College of Engineering is committed to the success of all underrepresented students in engineering. Support programs offered through Engineering Diversity Affairs include LEAD (Leadership through Engineering Academic Diversity), collaborative programs with WISE (Program for Women in Science and Engineering), and free tutoring available for women and students of color. The LEAD Program supports a learning community for first-year students of color in engineering as well as two academic orientation courses. Female first-year students can also enroll in the WISE Learning Community.

**Graduate Programs**

Strong graduate research programs in the college lead to many opportunities for undergraduate students. In addition to providing support for prospective and current graduate students, this office works with currently enrolled graduate students to assist them in gaining research experience via the Providing Experiences in Research for Undergraduate Students in Engineering (PERUSE) Program. Workshops about graduate school, help with the graduate school application process, and support for applying for high-level graduate fellowships are offered each year.

**Leadership Program**

The Engineering Leadership Program (ELP) prepares students for leadership roles by focusing on community engagement and public service. The mission of ELP is to create an environment in which the leaders of tomorrow can develop their full potential and commit to making the world a better place. ELP recruits students each year who commit to leadership development through a variety of activities in the classroom and beyond. Students may apply to become ELP scholars when they enter the college. They receive a scholarship that can be renewed each year for four years, participate in structured activities the first year, and then prepare a more personalized leadership portfolio proposal that includes significant learning experiences/projects.

For more information on the Engineering Leadership Program, please contact us at: 312 Marston Hall

**Scholarships**

Each year the College of Engineering awards $1.5 million in scholarships to engineering students. The generous support of hundreds of individuals and corporations allows us to recognize the academic accomplishments of outstanding, hard-working students. We have scholarships available for incoming freshmen, transfer students, and students currently enrolled in the College of Engineering. Detailed information on College of Engineering scholarships can be found at www.engineering.iastate.edu/scholarships. For university scholarships and other forms of financial aid, check out the Office of Student Financial Aid at www.financialaid.iastate.edu.

**Enrollment Services and Precollegiate Programs**

Enrollment Services and Precollegiate Programs assists elementary through high school students, their parents, and teachers in learning about engineering at Iowa State University. From directing the FIRST LEGO League to arranging special campus visits, our unit coordinates experiences for prospective students that include summer camps, hands-on workshops, Project Lead the Way, engineering-based events, and tours of engineering facilities. Engineering is more than what you may think. Visit us to learn about engineering and the many opportunities the college has to offer.

**International Programs and Services**

Engineering International Programs and Services (EIPS) prepares students for the global workplace by developing close partnerships with leading international universities and multinational companies. Because the practice of engineering is global, students are encouraged to consider study and work abroad experiences and to develop foreign language skills. EIPS has developed more than 30 partnerships with top universities and industries in Australia, Brazil, England, France, Germany, Italy, Mexico, Norway, Singapore, Sweden, Taiwan, and Turkey. Both English and foreign language options are available. For many programs, students pay Iowa State University tuition. Scholarships and financial aid are available.

**Student Services**

Engineering Student Services (ESS) provides services to prospective high school and transfer students as well as current students. Assistance and information is available regarding academic resources, academic advising, learning communities, class scheduling, orientation programs, and class placement issues. Current students are encouraged to consult with their adviser on a regular basis concerning academic progress. Engineering Student Services advises engineering students who have not declared a specific engineering major.
