

Join Us For an Afternoon Discussion About Your Future

Monday, April 16th at 1:30pm, Biorenewables Complex Atrium

Featured Speakers and an Industry Roundtable:

Karmyn Babcock, *Vice President, Operational Excellence & Technology*
The Weitz Co.

Motivating Women in Construction. Only 9% of U.S. construction workers are women. This session will provide firsthand insights from a woman currently working in the space about how women can excel in the workplace, inspiring both students and industry about how women and men can come together to drive change in the construction industry.

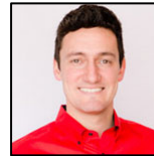

Joshua Peschel, *Assistant Professor of Agricultural and Biosystems Engineering*
Iowa State University

Robots Lend a Hand. Robots take to the stage to demonstrate what new technologies are already here—and how it will impact the ways workers perform jobs in the future.

Kurt Maldovan, *Director of Virtual Design and Construction*
Jacobs

Inside Emerging Tech. Take a step inside the latest technology advances, as a leader in the space gives an up close look at new trends with BIM, VDC, cloud, mobile, and so much more.

Daniel Wade, *Division Manager/Engineer*
Hilti

Insight into Connected Tools. Have you ever picked up a connected tool? This session will get to the heart of how these devices are advancing, while also demonstrating how they work.

Andrew Watts, *CEO*
Newtecnic

3D Printing and Technology. From 3D printing to new building methods, technology is changing how work is being done at the Jobsite. Listen to an expert talk about what it means from concept to fabrication, for the engineering design of structure, facades and internal environment.

Roger Jellicoe, *Consultant (former VP Device R&D, Intel; VP Mobile Devices, Motorola)*
pureLiFi

A Look at LiFi. Lights will change the way we communicate. This demo will show how LiFi works and will illustrate how it will advance connectivity, as the presenter offers a vision for the future of technology.

This first-of-its-kind **Human Skillset Academy** is an **opportunity for Iowa State students** in any major that have an interest in industry, technology, and entrepreneurship. These thought leadership forums will consist of the top influencers who bring business and leadership best practices that can help with your personal growth. Bring your resumes and appetites to talk with these companies (and more) about employment opportunities.
